

Claim Management Services

It's an old saying, but true – 80% of your clients' health claims may be incurred by 20% of the group's members. Claims for acute conditions, transplants, and other catastrophic conditions can be a very significant portion of your clients' total health costs. How can your client manage these costs? How can transplant costs be controlled and still provide the highest quality of care? Your client uses a PPO, but how are the out of network claims managed? Can additional discounts be obtained?

BP Inc. offers a full line of claim management services. Services that are designed to control and reduce claim costs.

Claim Management Services

- Case Management – Case management can improve the quality of care and reduce costs through monitoring treatment, discharge planning, and alternative treatment options. BP Inc. partners with case management companies that have proven savings records. They employ knowledgeable, registered nurses with extensive experience in transplants, critical care, and premature births.
- Transplant Networks – BP Inc. utilizes two premiere transplant networks, United Resource Networks (URN) and Interlink Health Services. Their Centers of Excellence have been developed to support successful, high quality, and cost effective transplants.
- Claims Settlement Services – Out of network claims can often be negotiated to produce discounts that are similar to discounts from network providers and hospitals. Even large PPO network claims can be negotiated to produce additional savings.

Advantages

- These services are all available through BP Inc – Your “Resource Center”
- Full coordination with stop loss coverage
- Increased control of healthcare costs

Help your client manage costs with BP Inc.
